### Purpose and expected outcome

Help employees find current internal policies and complete human resources requests with appropriate controls.

Reduce search time, improve response consistency, and correctly escalate sensitive cases.

## Identity, purpose, and governance

|                         |                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------|
| <b>Name</b>             | Employee Policy Assistant                                                                                      |
| <b>Purpose</b>          | Help employees find current internal policies and complete human resources requests with appropriate controls. |
| <b>Business problem</b> | Policies are distributed across several repositories, and the HR team receives repetitive inquiries.           |
| <b>Expected outcome</b> | Reduce search time, improve response consistency, and correctly escalate sensitive cases.                      |
| <b>Use case</b>         | Questions about leave, benefits, and hybrid work.                                                              |
| <b>Out of scope</b>     | Disciplinary decisions, legal advice, and automatic approval.                                                  |
| <b>Zone and risk</b>    | Z3 · MS-Z2 · Moderate residual risk                                                                            |
| <b>Audience</b>         | 3,500 internal users · Microsoft Teams                                                                         |
